

VERSION 1.0.0-beta.3 // ENGLISH

SKYBREAK PROTOCOL

GAME MANUAL

Ascent, controls, systems, levels, and cheat codes

Skybreak Protocol is a vertical cyberpunk arcade game. Each of the ten levels is a complete 15-floor ascent with its own scenery, music, and difficulty. Break platforms, disable drones, and reach the transmission tower.

GOAL

Reach level 10

START

3 lives

LEVELS

10 sectors

STORAGE

Local high score and settings

QUICK START

- 01 Select START ASCENT.
- 02 Move left or right below a damaged platform.
- 03 Jump and strike the platform from below.
- 04 Avoid drones or attack them with PICK.
- 05 After completing a level, upgrade ice-pick power or style.
- 06 Then start the newly unlocked next level.

MISSION

Skybreak Protocol is a vertical cyberpunk arcade game. Each of the ten levels is a complete 15-floor ascent with its own scenery, music, and difficulty. Break platforms, disable drones, and reach the transmission tower.

01 // ASCEND

Move left or right below a damaged platform. Jump and strike the platform from below.

02 // SURVIVE

Avoid drones or attack them with PICK.

03 // UPGRADE

After completing a level, upgrade ice-pick power or style.

MENU AND SYSTEM BUTTONS

START / TRY AGAIN

Starts a new run.

CHANGELOG

Opens the changes for the current version.

DEUTSCH / ENGLISH

Switches the language of the game page.

POWER / STYLE

Selects the ice-pick upgrade at a level transition.

RESUME / WEITER

Continues a paused game.

VIEW / ANSEHEN

Opens an available update; X dismisses the notice.

GOT IT / VERSTANDEN

Closes the iPhone app-mode notice.

CONTROLS AND BUTTONS

The mobile controls are visible in the screenshot on the left. Keyboard and touch trigger the same actions.

**← / →****Move**

Default A/D, configurable on desktop. Hold the touch button.

JUMP**Jump**

Default Space, configurable on desktop. Strike platforms from below.

PICK**Ice pick**

Default X, configurable on desktop. Attack drones and damaged modules.

SFX**Sound effects**

Switch sound effects independently from music.

MUSIC**Music**

Switch the soundtrack independently from SFX.

FULLSCREEN**Fullscreen**

Enter fullscreen; on iPhone, APP MODE explains installation.

PAUSE**Pause**

Pause or resume the game. Keyboard: P or Esc.

GRAPHICS**Graphics**

Select Low, Medium, High, or Ultra.

DIFFICULTY**Difficulty**

Select Easy, Medium, or Hard separately for every level.

KEY BINDINGS**Desktop keys**

Select an action and press a new key. Reset restores A, D, SPACE, and X.

GAME SYSTEMS

PLATFORMS

Break damaged modules from below or with the ice pick. Gaps require controlled jumps.

ENEMIES & HAZARDS

Patrol drones and falling energy fragments cost a life. Landing on a drone disables it.

CHESTS

Easy: persistent every 2-3 floors. Medium: available after halfway for 8 seconds. Hard: only after two thirds for 4.5 seconds and frequently relocated, including below.

POWER-UPS

Shield, extra life, score bonus, or 12 seconds of ice-pick overdrive. The shield can hold up to two charges.

UPGRADES & LEVELS

Each level has 15 floors and one consistent world. After completion, choose power or style; the next level then unlocks locally.

SCORING

Hard increases the multiplier. Normal runs save the local record; cheat runs do not change it.

LEVELS 1 TO 5

01

Neon Undercity

Cyan-magenta depths with service shafts, pipes, rain, and fast maglev traffic.

02

Chrome Bazaar

Pink-mint chrome market with floating lanterns, stalls, and animated advertising.

03

Toxic Transit

Toxic-green tunnel with structural ribs, moving train windows, and rising gas bubbles.

04

Crimson Firewall

Red-orange security zone with pulsing data walls, firewall columns, and flying embers.

05

Azure Data Sea

Deep-blue data sea with layered waves, bubbles, and luminous data jellyfish.

LEVELS 6 TO 10

06**Violet Reactor**

Violet energy core with rotating reactor rings, plasma arcs, and an unstable center.

07**Solar Megagrid**

Amber-red solar field with a blazing sun, heat shimmer, and moving panel arrays.

08**Ghost Network**

Pale-cyan network ruins with flickering phantom nodes, packet streams, and glitches.

09**Quantum Rift**

Purple-blue dimension with a rotating singularity, spiral arms, and warped star trails.

10**Skybreak Apex**

Bright summit above the clouds with dawn light, transmission rays, and the final tower.

SETTINGS, AUDIO, AND OFFLINE MODE

DIFFICULTY

Easy lowers pace and hazards, Medium is balanced, and Hard increases enemies, hazards, and points. Set per level.

GRAPHICS

Medium is recommended on phones. Ultra enables maximum effects and can make the device very warm. Avoid it in heat or direct sunlight.

MOBILE ULTRA

60 FPS is the safer default. Up to 120 FPS increases heat and battery use; adaptive thermal protection can reduce effects.

AUDIO

Every level has its own track. MUSIC and SFX are completely independent.

OFFLINE

Extract the release ZIP and open the starter for macOS, Windows, or Linux. All ten music tracks are included.

UPDATES

On startup, the game checks public GitHub releases. Only the update check needs internet; game data remains local.

SECRET CHEAT CODES

Cheats work with touch and keyboard. They apply only to the current run. A run using a cheat does not update the local high score.

- 01 Start a run.
- 02 Quickly tap or click the SP symbol at the top left five times.
- 03 After CHEAT LINK READY appears, enter the sequence within 10 seconds. The sequence itself must be completed within 7 seconds.
- 04 Activate the SP symbol five times again before using another cheat.

IMMORTAL

← → ← → JUMP PICK

Blocks hits and falls in the current level. Ends at the next level.

DOUBLE SHIELD

JUMP JUMP ← → PICK

Immediately grants two shield charges.

30-S OVERDRIVE

PICK JUMP PICK JUMP ← →

Maximum ice-pick enhancement for 30 seconds.

EXTRA LIFE

← ← → → JUMP PICK

Adds one life, up to a maximum of nine.

CHEAT RUN // LOCAL ONLY // NO HIGH-SCORE ENTRY
