

VERSION 1.0.0-beta.010 // ENGLISH

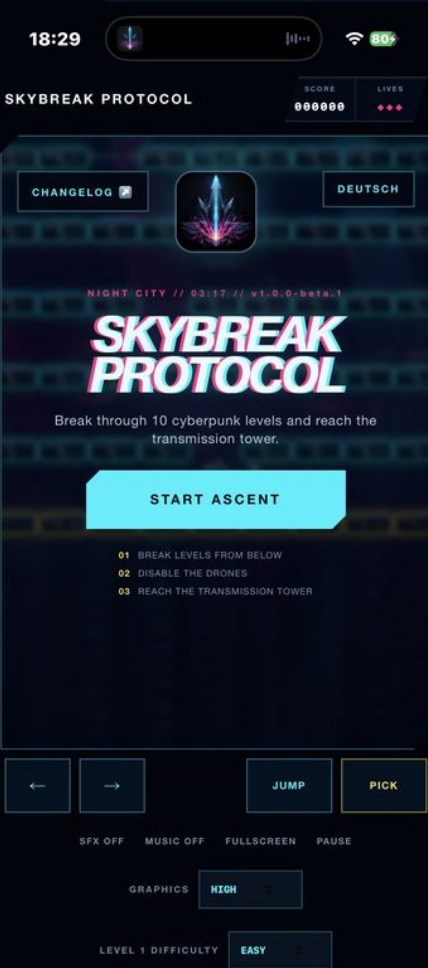

SKYBREAK PROTOCOL

GAME MANUAL

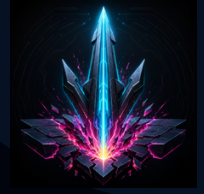

Ascent, controls, systems, levels, and cheat codes

Skybreak Protocol is a vertical cyberpunk arcade game. Each of the ten levels is a complete 15-floor ascent with its own scenery, music, and difficulty. Break platforms, disable drones, and reach the transmission tower.

GOAL	Reach level 10
START	3 lives
LEVELS	10 sectors
STORAGE	Local high score and settings

QUICK START

- 01 Select START ASCENT.
- 02 Move left or right below a damaged platform.
- 03 Jump and strike the platform from below.
- 04 Avoid drones or attack them with PICK.
- 05 After completing a level, upgrade ice-pick power or style.
- 06 Then start the newly unlocked next level.

MISSION

Skybreak Protocol is a vertical cyberpunk arcade game. Each of the ten levels is a complete 15-floor ascent with its own scenery, music, and difficulty. Break platforms, disable drones, and reach the transmission tower.

01 // ASCEND

Move left or right below a damaged platform. Jump and strike the platform from below.

02 // SURVIVE

Avoid drones or attack them with PICK.

03 // UPGRADE

After completing a level, upgrade ice-pick power or style.

MENU AND SYSTEM BUTTONS

START / TRY AGAIN

Starts a new run; choose an unlocked start level first.

CHANGELOG

Opens the changes for the current version.

DEUTSCH / ENGLISH

Switches the language of the game page.

POWER / STYLE

Selects the displayed next power or style level after a completed level.

RESUME / WEITER

Continues a paused game.

VIEW / ANSEHEN

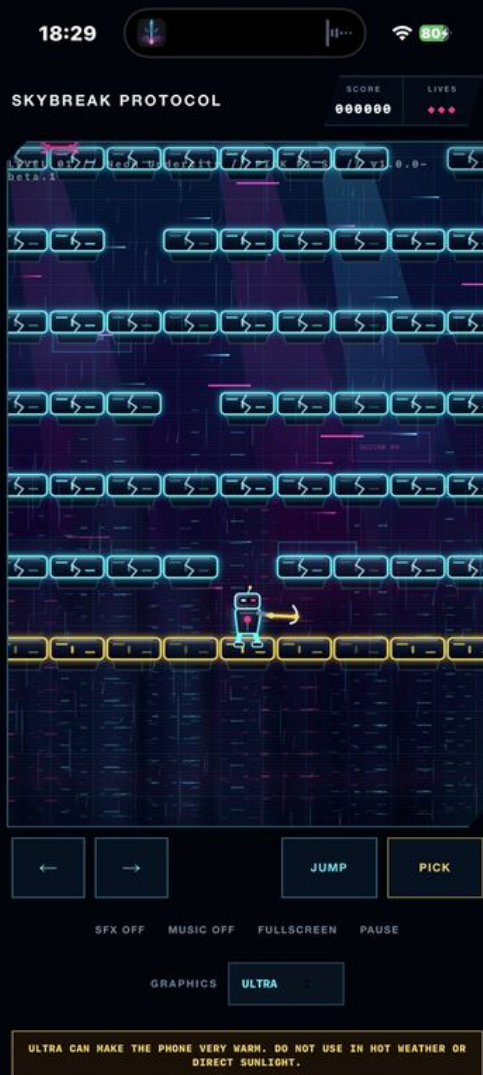

Opens an available update; X dismisses the notice.

GOT IT / VERSTANDEN

Closes the iPhone app-mode notice.

CONTROLS AND BUTTONS

The mobile controls are visible in the screenshot on the left. Keyboard and touch trigger the same actions.

← / →

Move

Default A/D, configurable on desktop. Hold the touch button.

JUMP

Jump

Default Space, configurable on desktop. Strike platforms from below.

PICK

Ice pick

Default X, configurable on desktop. Attack drones and damaged modules.

SFX

Sound effects

Switch sound effects independently from music.

MUSIC

Music

Switch the soundtrack independently from SFX.

FPS ON/OFF

Performance display

Shows or hides local FPS and frame time. Desktop also shows CPU values.

FULLSCREEN

Fullscreen

Enter fullscreen; on iPhone, APP MODE explains installation.

PAUSE

Pause

Pause or resume the game. Keyboard: P or Esc.

GRAPHICS

Graphics

Select Low, Medium, High, or Ultra. Next to it, select 720p, 1080p, or 4K for the internal render resolution. FPS ON/OFF toggles the local FPS display.

RESOLUTION

Resolution

iPhone 17 Pro: Ultra reaches 60 FPS at 1080p. 4K Ultra is not a 60 FPS mobile mode.

DIFFICULTY

Difficulty

Select Easy, Medium, or Hard. The choice carries into the next level.

KEY BINDINGS

Desktop keys

Select an action and press a new key. Reset restores A, D, SPACE, and X.

GAME SYSTEMS

PLATFORMS

Alongside stable and fragile modules, there are moving, icy, temporarily phased, and rift platforms. Damaged modules can be destroyed from below or with the ice pick. Invisible phase platforms do not support the robot.

ENEMIES & HAZARDS

Patrol, leap attack, and direction change form the three enemy archetypes; shield, shooter, and hover enemies add roles. Energy fragments, side lasers, and energy pulses cost a life. Landing on a drone disables it.

CHESTS

Easy: persistent every 2-3 floors. Medium: available after halfway for 8 seconds. Hard: only after two thirds for 4.5 seconds and frequently relocated. Hard chests stay in view and prefer the player's height or above. An active chest stays active while backtracking.

OBJECTIVES & ICE PICK

Two energy cells or access switches must be activated before the level goal. The ice pick dissolves enemy projectiles and breaks shields. A first hit freezes a normal enemy; the next disables it. From power 4, it briefly creates an ice bridge.

GUARDIANS & LEVELS

Each level has 15 floors, unique rules, an ice-pick base model, and a guardian. Its shots vary by level and become faster at the final integrity stage. The next upgrade preview follows a win.

COMPLETION & VICTORY

After every level goal, the robot shows SKYBREAK DANCE for five seconds before the upgrade or finale. The cosmetic bikini avatar instead shows a level-specific look presentation. After level 10, the tower activates; cheat runs do not change the record.

LEVELS 1 TO 5

01

Neon Undercity

Cyan-magenta depths with service shafts, pipes, rain, and fast maglev traffic. Rule: ascent with moving platforms.

02

Chrome Bazaar

Pink-mint chrome market with floating lanterns, stalls, and animated advertising. Rule: fracture zones with many fragile modules.

03

Toxic Transit

Toxic-green tunnel with structural ribs, moving train windows, and rising gas bubbles. Rule: toxic draft pushes sideways; icy platforms are slippery.

04

Crimson Firewall

Red-orange security zone with pulsing data walls, firewall columns, and flying embers. Rule: fracture zones and horizontal firewall lasers.

05

Azure Data Sea

Deep-blue data sea with layered waves, bubbles, and luminous data jellyfish. Rule: data current to the left and moving platforms.

LEVELS 6 TO 10

06

Violet Reactor

Violet energy core with rotating reactor rings, plasma arcs, and an unstable center. Rule: energy pulses and phased platforms.

07

Solar Megagrid

Amber-red solar field with a blazing sun, heat shimmer, and moving panel arrays. Rule: solar storm, side lasers, side draft, ice, and fracture zones.

08

Ghost Network

Pale-cyan network ruins with flickering phantom nodes, packet streams, and glitches. Rule: energy pulses, phased platforms, and side draft.

09

Quantum Rift

Purple-blue dimension with a rotating singularity, spiral arms, and warped star trails. Rule: rift jump fields reposition the robot.

10

Skybreak Apex

Bright summit above the clouds with dawn light, transmission rays, and the final tower. Rule: apex ascent with movement, side lasers, and side draft.

SETTINGS, AUDIO, AND OFFLINE MODE

DIFFICULTY

Easy is the onboarding mode: 8 lives, no regular enemies, one required objective, stable platforms, and no drafts or environmental hazards. The guardian has 1 hit point and fires more slowly. Medium is balanced; Hard increases enemies, hazards, and points.

GRAPHICS

On an iPhone 17 Pro, Ultra reaches 60 FPS at 1080p. 4K Ultra is not a 60 FPS mobile mode. Ultra can still warm the device. In heat, sunlight, or when warm, choose Medium or Low.

MOBILE ULTRA

60 FPS is the safer default. FPS ON/OFF toggles the local display. Up to 120 FPS increases heat and battery use; adaptive thermal protection can reduce effects.

AUDIO

Every level has its own track. MUSIC and SFX are completely independent.

OFFLINE

Extract the release ZIP and open the starter for macOS, Windows, or Linux. All ten music tracks are included.

UPDATES

On startup, the game checks public GitHub releases. Only the update check needs internet; game data remains local.

UPGRADES AND PERFORMANCE DISPLAY

POWER 1 TO 10

Every power level adds 8 reach. P1-2 breaks 1, P3-4 2, P5-6 3, P7-8 4, and P9-10 5 adjacent platform modules per strike.

STYLE 1 TO 10

Gold Curve, Cyan Blade, Pink Spike, Green Curve, Orange Blade, Violet Spike, Ice Curve, Lilac Blade, White Spike, and Sun Curve. The preview names the next level.

LEVEL MODELS

Independently from the style upgrade, every level uses its own ice-pick base model, enemy and guardian form, and color world.

FPS ON/OFF

During a run, the mobile header shows FPS and average frame time. On desktop, LIVE also shows CPU time for updating and drawing the game.

RESOLUTION

720p saves performance, 1080p is the recommended Mobile Ultra mode on the tested iPhone 17 Pro. 4K is a quality and screenshot mode.

PROGRESS

Completed levels unlock locally. Choose an unlocked start level from the start menu; difficulty carries into the next level.

SECRET CHEAT CODES

Cheats work with touch and keyboard. They apply only to the current run. A run using a cheat does not update the local high score. The bikini avatar is an additional music-toggle cheat and needs no CHEAT LINK.

- 01 Start a run.
- 02 Quickly tap or click the SP symbol at the top left five times.
- 03 After CHEAT LINK READY appears, enter the sequence within 10 seconds. The sequence itself must be completed within 7 seconds.
- 04 Activate the SP symbol five times again before using another cheat.

IMMORTAL

← → ← → JUMP PICK

Blocks hits and falls in the current level. Ends at the next level.

DOUBLE SHIELD

JUMP JUMP ← → PICK

Immediately grants two shield charges.

30-S OVERDRIVE

PICK JUMP PICK JUMP ← →

Maximum ice-pick enhancement for 30 seconds.

EXTRA LIFE

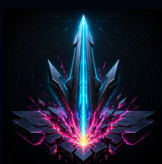

← ← → → JUMP PICK

Adds one life, up to a maximum of nine.

BIKINI AVATAR

MUSIC OFF/ON ×2

During an active run, switch MUSIC off and on twice within 5 seconds. Cosmetic only and only for that run; shows a confirmation and level-specific look presentations.

CHEAT RUN // LOCAL ONLY // NO HIGH-SCORE ENTRY
